

Teeth WHITENING easily available

Ever dreamed of having a smile to be proud of? Well the answer could be right on your doorstep. The White Smile Clinic aims to make it available to everyone and amazingly can transform your teeth within one hour.

Teeth Whitening is no longer just for the rich and famous. The White Smile Clinic's aim is to make it available to everyone, offering the latest cold light technology from America which will whiten teeth within one hour. A natural looking white, bright smile can be yours for only £239 or there is even an option to pay using interest free credit payments of £19.92 per month over twelve months.

The clinic employs only qualified dental nurses who have been further trained by the Dental Training Institute in this particular teeth whitening process, so customers know they are in safe hands. The nurses are also selected for their cheerful dispositions, professionalism and an ability to put customers at their ease. Clients are asked to complete a two page Health History Questionnaire beforehand to highlight any potential problems. Having experience in being able to spot inherent teeth and gum disorders enables the dental nurse to screen out anyone who may not achieve a happy result and refer them instead to a dentist where cosmetic dentistry might be thought a more appropriate course of action.

Crowns and veneers for example will not lighten beyond their original shade, and anyone with untreated gum disease would be advised to see their dentist prior to whitening. Generally speaking though, anyone in good health with a healthy mouth is a suitable customer.

Once the questionnaire has been completed and discussed, the nurse will use a shade chart to agree with the customer the current shade of their teeth. The solution is then applied directly to the teeth and a light is shined onto the solution to activate the whitening agent. The treatment consists of three or four 10 or 15 minute sessions after which the new shade will be gauged.

The White Smile Clinic website (www.thewhitesmileclinic.co.uk) boasts many testimonials from delighted customers. The whitening process uses the latest technology, there are no harmful UV rays and is not painful.

Teeth whitening is becoming popular with a wide selection of people including those who want to look their best for a special occasion such as a wedding or holiday, interviewees and business people. It goes hand in hand with other beauty treatments to give a general confidence boost and can help people to look younger.
